Hybridoma growth medium with hypoxanthine and thymidine (serum-containing)

Catalog # 03805

500 mL

Product Description

ClonaCell™-HY Medium E is a serum-containing, nutritionally rich liquid medium optimized for hybridoma expansion after hypoxanthine, aminopterin, thymidine (HAT) selection. The medium contains hypoxanthine and thymidine (HT) and is used to wean hybridomas off aminopterin used during the selection process. This medium has been verified for use in mouse and rat hybridoma development and monoclonal antibody production, and reportedly is compatible for production, cloning, and expansion of hybridomas using lymphocytes from a variety of host animals including human, mouse, rat, and hamster. ClonaCell™-HY Medium E has proven effective for subcloning and stabilization of unstable hybridoma cell lines.

Properties

- Storage:** Store at -20°C.
- Shelf Life:** Stable until expiry date (EXP) on label.
- Contains:**
- DMEM
 - Serum
 - Hypoxanthine and thymidine (HT)
 - Gentamicin
 - 2-Mercaptoethanol
 - Phenol red
 - L-Glutamine and other supplements
 - Other ingredients

Handling / Directions For Use

1. Thaw ClonaCell™-HY Medium E at room temperature (15 - 25°C) or overnight at 2 - 8°C. Mix well.
NOTE: Do not thaw ClonaCell™-HY Medium E in a 37°C water bath.
2. If ClonaCell™-HY Medium E is not used immediately, store at 2 - 8°C for up to 2 weeks. Alternatively, aliquot and store at -20°C until expiry date as indicated on the label.

For further information, refer to the Technical Manual: ClonaCell™-HY: A Complete Workflow for Hybridoma Generation, available at www.stemcell.com or contact us to request a copy.
