Product Description

NeuroCult™ SM1 (STEMCELL Modified-1) Neuronal Supplement is a serum-free supplement for the culture of primary or pluripotent stem cell (PSC)-derived neurons. NeuroCult™ SM1 is used in combination with a basal neural medium such as BrainPhys™ Neuronal Medium (Catalog #05790) or as a serum-replacement supplement for various customizable applications wherever B27 is used.

The NeuroCult™ SM1 formulation was developed based on the published formulation of Brewer's B27 supplement. It has been optimized to reproducibly support increased survival and maturation of functional neurons in both short- and long-term cultures with minimal glial cell contamination. NeuroCult™ SM1 is also a component of several BrainPhys™ kits for primary and PSC-derived neuronal cell culture. For further details and protocols, refer to the Product Information Sheet (PIS) for BrainPhys™, available at www.stemcell.com or contact us to request a copy.

Storage and Stability

PRODUCT NAME	CATALOG #	SIZE	STORAGE	SHELF LIFE
NeuroCult™ SM1 Neuronal Supplement*	05711	10 mL	Store at -20°C.	Stable until expiry date (EXP) on label.

*Please refer to the Safety Data Sheet (SDS) for hazard information. Lot-to-lot color variations include light to dark yellow or orange. This will not affect performance.

Directions for Use

NOTE: NeuroCult™ SM1 is provided as a 50X stock solution that may be added to the medium of your choice; it may be used as an alternative to Brewer's B27 supplement.

Thaw one bottle of NeuroCult™ SM1 at room temperature (15 - 25°C) for 1 hour.

NOTE: If not used immediately, aliquot and store at -20°C. Do not exceed the expiry date (EXP) as indicated on the label. After thawing aliquots, use immediately. Do not re-freeze.

- For culturing primary tissue-derived neurons and for neuronal differentiation of hPSC-derived neural progenitor cells using NeuroCult™ SM1, refer to the PIS for BrainPhys™ Neuronal Medium, available at www.stemcell.com or contact us to request a copy.
- For detailed procedures on immunolabeling, refer to the Technical Manual: In Vitro Proliferation and Differentiation of Mouse and Rat Neural Stem and Progenitor Cells Using NeuroCult™, available at www.stemcell.com or contact us to request a copy.
