**Product Description**

StemSpan™ Serum-Free Expansion Medium II (SFEM II) is a modified version of StemSpan™ SFEM. It has been developed for the in vitro culture and expansion of human hematopoietic cells. This medium contains pre-tested bovine serum albumin, insulin, transferrin, and other supplements in Iscove's MDM. Recombinant hematopoietic growth factors, required for the optimal growth and expansion of hematopoietic cells, have not been added to StemSpan™ SFEM II. This allows users the flexibility to prepare medium that meets their requirements.

Using appropriate cytokines (e.g. StemSpan™ CC100, StemSpan™ CC110, or StemSpan™ CD34+ Expansion Supplement; see Notes and Tips), StemSpan™ SFEM II can be used for the expansion of total nucleated cells and CD34+ cells from cord blood, bone marrow, or other cell sources. StemSpan™ SFEM II can also be used to expand and differentiate lineage-committed progenitor cells to generate erythroblasts, granulocytes, monocytes, or megakaryocytes when used with StemSpan™ Myeloid Expansion Supplement (Catalog #02693), StemSpan™ Erythroid Expansion Supplement (Catalog #02692), StemSpan™ Myeloid Expansion Supplement II (Catalog #02694), or StemSpan™ Megakaryocyte Expansion Supplement (Catalog #02696), respectively.

**Properties**

- **Storage:** Store at -20°C.
- **Shelf Life:** Stable for 18 months from date of manufacture (MFG) on label.
- **Contains:**
  - Iscove’s MDM
  - Bovine serum albumin
  - Recombinant human insulin
  - Human transferrin (iron-saturated)
  - 2-Mercaptoethanol
  - Supplements

This product contains material derived from human plasma. Donors have been tested and found negative for hepatitis B surface antigen (HBsAg) and HIV-1 antibodies and/or HIV-1 antigen. However, this product should be considered potentially infectious and treated in accordance with universal handling precautions.

**Directions for Use**

**PREPARATION OF COMPLETE MEDIUM**

1. Thaw StemSpan™ SFEM II at room temperature (15 - 25°C) or overnight at 2 - 8°C. Mix thoroughly.
   
   **NOTE:** If not used immediately, store at 2 - 8°C for up to 1 month. Alternatively, aliquot into tubes and store at -20°C. After thawing aliquots, do not re-freeze. Do not exceed the shelf life of the medium.

2. Add desired cytokines, growth factors, and other components to StemSpan™ SFEM II. Mix thoroughly.
   
   **NOTE:** Added components and cells in sterile cell culture medium (e.g. Iscove's MDM or DMEM) should not exceed ~10% of total volume.

3. Add cells, mix thoroughly, and set up cultures as desired.
   
   **NOTE:** Addition of lipids is not recommended.

For complete instructions for CD34+ cell expansion using StemSpan™ media and StemSpan™ CD34+ Expansion Supplement (10X; Catalog #02691), refer to the PIS for the supplement (Document #10000000078), available at www.stemcell.com or contact us to request a copy.

For a complete list of expansion supplements for use with StemSpan™ SFEM II, see Notes and Tips. Refer to the Product Information Sheet (PIS) for each supplement for recommended cell expansion protocols with StemSpan™ media.
ASSESSMENT OF HEMATOPOIETIC CELLS
Assessment of CD34+ cells before and after culture may be performed by flow cytometry using the following fluorochrome-conjugated antibody clones:

- Anti-Human CD34 Antibody, Clone 5B1 (Catalog #60013) or Clone 563 (Catalog #60119) or Clone 8G12 (Catalog #60121)
- Anti-Human CD45 Antibody, Clone HI30 (Catalog #60018) or Clone 2D1 (Catalog #60123)
- Anti-Human CD38 Antibody, Clone AT-1 (Catalog #60131) or Clone H1T2 (Catalog #60014)
- Anti-Human CD90 Antibody, Clone 5E10 (Catalog #60045)

Notes and Tips
Selection of an optimal growth factor combination is dependent upon the source and type of cells and the experimental objectives of the researcher. StemSpan™ expansion supplements, described below, are suitable for use with StemSpan™ SFEM II.

• StemSpan™ CD34+ Expansion Supplement (10X) (Catalog #02691)
  ○ Culture and expansion of large numbers of human CD34+ progenitor cells
  ○ Contains: rh SCF, rh TPO, rh IL-3, rh IL-6, rh Flt3 ligand, other additives

• StemSpan™ CC100 (Catalog #02690)
  ○ Culture and expansion of human hematopoietic cells
  ○ Contains: rh Flt3 ligand, rh SCF, rh IL-3, rh IL-6

• StemSpan™ CC110 (Catalog #02697)
  ○ Culture and expansion of human hematopoietic cells
  ○ Contains: rh Flt3 ligand, rh SCF, rh TPO

• StemSpan™ Erythroid Expansion Supplement (100X) (Catalog #02692)
  ○ Expansion and lineage-specific differentiation of human CD34+ cells into erythroid progenitor cells
  ○ Contains: rh SCF, rh IL-3, rh EPO

• StemSpan™ Megakaryocyte Expansion Supplement (100X) (Catalog #02696)
  ○ Expansion and lineage-specific differentiation of human CD34+ cells into megakaryocyte progenitor cells
  ○ Contains: rh SCF, rh TPO, rh IL-6, rh IL-9

• StemSpan™ Myeloid Expansion Supplement (100X) (Catalog #02693)
  ○ Expansion and lineage-specific differentiation of human CD34+ cells into granulocytes
  ○ Contains: rh SCF, rh TPO, rh G-CSF, rh GM-CSF

• StemSpan™ Myeloid Expansion Supplement II (100X) (Catalog #02694)
  ○ Expansion and lineage-specific differentiation of human CD34+ cells into monocytes
  ○ Contains: rh Flt3 ligand, rh SCF, rh TPO, rh M-CSF, rh GM-CSF, other additives

SCF = stem cell factor; EPO = erythropoietin; TPO = thrombopoietin; rh = recombinant human; IL = interleukin; Flt = fms-like tyrosine kinase
