mTeSR™1

Defined, feeder-free maintenance medium for human ES and iPS cells

Catalog #85850  500 mL
Catalog #85857  1 L
Catalog #85870  10 x 500 mL
Catalog #85875  25 x 500 mL

Product Description
mTeSR™1 medium is a complete, serum-free, defined formulation designed for the feeder-free maintenance and expansion of human embryonic stem (ES) cells and human induced pluripotent stem (iPS) cells in the undifferentiated state. Complete mTeSR™1 medium (Basal Medium + 5X Supplement) contains recombinant human basic fibroblast growth factor (rh bFGF) and recombinant human transforming growth factor β (rh TGFβ). Addition of further growth factors is not required.
mTeSR™1 may be used with either Corning® Matrigel® hESC-Qualified Matrix (Corning Catalog #354277) or Vitronectin XF™ (Catalog #07180, a matrix developed and manufactured by Nucleus Biologics) as the culture matrix.

Each lot of mTeSR™1 5X Supplement is used to prepare complete mTeSR™1 medium and then performance-tested in a culture assay using human pluripotent stem cells (hPSCs).

Component Storage and Stability
The following components are sold as part of the mTeSR™1 medium kits (see Product Information) and are not available for individual sale.

Preparation of Complete mTeSR™1 Medium
Use sterile technique to prepare complete mTeSR™1 medium (Basal Medium + 5X Supplement). The following example is for preparing 500 mL of complete medium. If preparing 1 L of complete medium, add 2 x 100 mL of 5X Supplement to 800 mL of Basal Medium. If preparing other volumes, adjust accordingly.

1. Thaw mTeSR™1 5X Supplement and warm to room temperature. Mix thoroughly.

   NOTE: mTeSR™1 5X Supplement may appear slightly cloudy after thawing. If this is noted, place in a 37°C water bath for approximately 5 minutes, swirled occasionally until supplement becomes clear. Supplement must be free of cloudiness before adding to basal medium (step 2).

   NOTE: Once thawed, use supplement immediately or aliquot and store at -20°C for up to 3 months. Do not exceed the shelf life of the supplement. After thawing the aliquoted supplement, use immediately. Do not re-freeze.
2. Add 100 mL of mTeSR™1 5X Supplement to 400 mL of mTeSR™1 Basal Medium. Mix thoroughly.
   NOTE: If not used immediately, store complete mTeSR™1 medium at 2 - 8°C for up to 2 weeks. Alternatively, aliquot and store at
   -20°C for up to 6 months. Do not exceed the shelf life of the individual components. After thawing the aliquoted complete medium, use
   immediately or store at 2 - 8°C for up to 2 weeks. Do not re-freeze.
   If prepared aseptically, complete mTeSR™1 medium is ready for use. If desired, the medium can be filtered using a 0.2 - 0.22 μm
   low protein binding polyethersulfone (PES) filter unit (e.g. Fisher 09-741-04 [0.2 μm, 250 mL]; Fisher SCGP00525 [0.22 μm, 50 mL]).

Directions for Use
For complete instructions on maintaining human ES and iPS cells in mTeSR™1, refer to the Technical Manual: Maintenance of Human
Pluripotent Stem Cells in mTeSR™1 (Document #10000005505) available at www.stemcell.com or contact us to request a copy.

Assessment of hPSCs
The following antibodies can be used to characterize hPSCs by flow cytometry or immunocytochemistry:
- Anti-Human SSEA-4 Antibody, Clone MC-813-70 (Catalog #60062)
- Anti-Human TRA-1-60 Antibody, Clone TRA-1-60R (Catalog #60064)
- Anti-Human OCT4 (OCT3) Antibody, Clone 3A2A20 (Catalog #60093)
For complete flow cytometry protocols and antibodies that can be used, refer to the Technical Manual: Maintenance of Human Pluripotent
Stem Cells in mTeSR™1 (Document #10000005505), available at www.stemcell.com or contact us to request a copy.
