

Gentle Cell Dissociation Reagent

cGMP, enzyme-free cell dissociation reagent

Catalog #100-0485 100

Catalog #100-1077 500

Product Description

Gentle Cell Dissociation Reagent (GCDR) is an enzyme-free reagent suitable for the dissociation of human embryonic stem (ES) cells or human induced pluripotent stem (iPS) cells into cell aggregates for routine passaging or into a single-cell suspension. It is also suitable for the isolation of intestinal crypts to establish intestinal organoids and for breaking up Corning® Matrigel® domes when passaging organoid cultures. GCDR does not contain enzymes or other proteins.

GCDR is now also manufactured following relevant cGMPs under a certified quality management system to ensure the highest quality and consistency for reproducible results. For additional quality information, refer to www.stemcell.com/compliance.

- cGMP, enzyme-free, and chemically defined
- Gentle on cells
- High expansion of human ES/iPS cells during routine culture
- Simple, room temperature passaging protocols

Properties

Stability and Storage: Store at 15 - 25°C. Stable until expiry date (EXP) on label.

Directions for Use

For complete instructions on using Gentle Cell Dissociation Reagent with various STEMCELL media, refer to the corresponding documents listed below. Documents are available at www.stemcell.com, or contact us at techsupport@stemcell.com to request a copy.

- TeSR™-E8™ (Catalog #05990) - Document #10000005516
- mTeSR™1 (Catalog #85850) - Document #10000005505
- mTeSR™ Plus (Catalog #100-0276) - Document #10000007757
- TeSR™-AOF (Catalog #100-0401) - Document #10000008160
- STEMdiff™ Neural Induction Medium (Catalog #05835) - Document #10000005588
- STEMdiff™ Definitive Endoderm Kit (Catalog #05110) - Document #10000003448
- IntestiCult™ Organoid Growth Medium (Mouse; Catalog #06005) - Document #10000003509
