

## Antibodies

### Anti-Human ACE2 Antibody, Clone AC384, Biotin

Mouse monoclonal IgG1 antibody against  
human angiotensin-converting enzyme 2  
(ACE2), biotin-conjugated

Catalog #100-0761

50 µg

1 mg/mL

## Product Description

The AC384 antibody reacts with angiotensin-converting enzyme 2 (ACE2), a type I integral membrane protein, which includes a short C-terminal cytoplasmic domain made of 22 amino acids, a transmembrane domain, and a large N-terminal ectodomain made of 740 amino acids. The N-terminal domain of ACE2 contains a catalytic zinc-binding motif, which shares a 42% similarity to the catalytic binding domain of ACE. Despite the similarity in catalytic domains, ACE2 functions as a carboxypeptidase, while ACE functions as either a peptidyl dipeptidase or an endopeptidase. In humans, ACE2 is a key regulator of the renin-angiotensin system, where it catalyzes the cleavage of the vasoconstrictor peptide angiotensin II to angiotensin 1-7. Expression of ACE2 can be found on endothelial cells throughout the body, such as in the kidney, heart, and lungs. In the airways leading to the lungs, ACE2 provides the main entry point for SARS-CoV-2 (2019-nCoV). Once the SARS-CoV-2 Spike Protein binds to ACE2, viral fusion with the host cell membrane can occur, resulting in viral RNA genome delivery.

Target Antigen Name:	ACE2
Alternative Names:	SARS Receptor, Angiotensin-converting Enzyme 2, ACEH, Metalloprotease MPROT15, SARS-CoV-2 Receptor
Gene ID:	59272
Species Reactivity:	Human; does not detect recombinant human ACE2 with a C-terminal tag
Host Species:	Mouse
Clonality:	Monoclonal
Clone:	AC384
Isotype:	IgG1, kappa
Immunogen:	Extracellular domain of human ACE2 recombinant protein (aa 18 - 740)
Conjugate:	Biotin

## Applications

Reported: ELISA, FC, Functional Blocking, WB

Abbreviations: CellSep: Cell separation; ChIP: Chromatin immunoprecipitation; FA: Functional assay; FACS: Fluorescence-activated cell sorting; FC: Flow cytometry; ICC: Immunocytochemistry; IF: Immunofluorescence microscopy; IHC: Immunohistochemistry; IP: Immunoprecipitation; RIA: Radioimmunoassay; WB: Western blotting

## Properties

Formulation:	Phosphate-buffered solution, pH 7.4
Purification:	The antibody was purified by affinity chromatography.
Stability and Storage:	Product stable at -20°C when stored undiluted. Stable until expiry date (EXP) on label.
Directions for Use:	The suggested use of this antibody is: ELISA, 1:2000 - 1:10,000; WB, 1:2000 - 1:10,000. It is recommended that the antibody be titrated for optimal performance for each application.
