

Antibodies

Catalog #60033AD

Anti-Mouse TER119 Antibody, Clone TER-119, Alexa Fluor® 488

Rat monoclonal IgG2b antibody
against mouse TER119, Alexa Fluor®
488-conjugated

100 µg 0.5 mg/mL

Product Description

The TER-119 antibody reacts with murine TER119 (Ly-76), an ~52 kDa protein associated with glycophorin A on the surface of cells of the erythroid lineage in embryonic yolk sac, fetal and newborn liver, adult bone marrow, peripheral blood, and lymphoid organs. TER119 is an erythroid-specific marker expressed at all stages of differentiation from early proerythroblasts to mature erythrocytes, but not by erythroid colony-forming cells (BFU-E, blast-forming unit erythroid, or CFU-E, colony-forming unit erythroid). The TER-119 antibody is a component of the "lineage cocktail" used to detect, or deplete cells committed to hematopoietic lineages. In adult mice, TER119 is found on ~20 - 25% of bone marrow cells and ~2 - 3% of splenocytes.

| | |
|----------------------|-----------------------------------|
| Target Antigen Name: | TER119 |
| Alternative Names: | Ly-76, TER-119 |
| Gene ID: | 104231 |
| Species Reactivity: | Mouse |
| Host Species: | Rat (WI) |
| Clonality: | Monoclonal |
| Clone: | TER-119 |
| Isotype: | IgG2b, kappa |
| Immunogen: | Mouse (C57BL/6) fetal liver cells |
| Conjugate: | Alexa Fluor® 488 |

Applications

| | |
|-----------------------|---|
| Verified: | FC |
| Reported: | FC, ICC, IF, IHC |
| Special Applications: | This antibody clone has been verified for purity assessments of cells isolated with EasySep™ kits, including EasySep™ Mouse CD4+ T Cell Isolation Kit (Catalog #19852). |

Abbreviations: CellSep: Cell separation; ChIP: Chromatin immunoprecipitation; FA: Functional assay; FACS: Fluorescence activated cell sorting; FC: Flow cytometry; ICC: Immunocytochemistry; IF: Immunofluorescence microscopy; IHC: Immunohistochemistry; IP: Immunoprecipitation; RIA: Radioimmunoassay; WB: Western blotting

Properties

| | |
|------------------------|--|
| Formulation: | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide |
| Purification: | The antibody was purified by affinity chromatography and conjugated with Alexa Fluor® 488 under optimal conditions. The solution is free of unconjugated Alexa Fluor® 488. |
| Stability and Storage: | Product stable at 2 - 8°C when stored undiluted. Do not freeze. Protect product from prolonged exposure to light. For product expiry date, please contact techsupport@stemcell.com . |
| Directions for Use: | For flow cytometry the suggested use of this antibody is ≤ 0.25 µg per 1 x 10 ⁶ cells in 100 µL volume. It is recommended that the antibody be titrated for optimal performance for each application. |

Data

Flow cytometry analysis of C57BL/6 mouse bone marrow cells labeled with Anti-Mouse TER119 Antibody, Clone TER-119, Alexa Fluor® 488 (filled histogram) or a rat IgG2b, kappa Alexa Fluor® 488 isotype control antibody (solid line histogram).
