**Product Description**

The TC15-12F12.2 antibody reacts with CD150 (signaling lymphocyte activation molecule or SLAM), an ~75 kDa type I transmembrane glycoprotein that plays multiple roles in the immune response by serving as a cell adhesion molecule and/or coreceptor. It is differentially expressed by T cells, immature thymocytes, B cells, dendritic cells, macrophages and endothelial cells. The expression pattern differs according to cell type and activation status. Expression is rapidly induced upon activation of T cells, B cells and dendritic cells, with synthesis by T cells being maintained on Th1 but not Th2 clones. CD150-mediated co-stimulation of TCR-activated T cells enhances the production of IFN-γ by Th1 cells, a response that can be augmented by binding of the TC15-12F12.2 antibody. CD150 is thought to mediate signal transduction by associating with the intracellular protein tyrosine phosphatase, SHP-2. CD150 also has functions in hematopoietic cell development and is a useful marker for detection of multipotent hematopoietic stem cells (in concert with other markers such as CD48 and CD41). CD150 is not expressed on non-multipotent hematopoietic progenitor cells.

**Target Antigen Name:** CD150 (SLAM)

**Alternative Names:** IPO-3, Signaling lymphocyte activation molecule

**Gene ID:** 27218

**Species Reactivity:** Mouse

**Host Species:** Rat (LEW)

**Clonality:** Monoclonal

**Clone:** TC15-12F12.2

**Isotype:** IgG2a, lambda

**Immunogen:** Mouse SLAM-human IgG1 fusion protein

**Conjugate:** Unconjugated

**Applications**

- **Verified:** FC
- **Reported:** FA, FC, IP

**Abbreviations:**
- CellSep: Cell separation
- ChIP: Chromatin immunoprecipitation
- FA: Functional assay
- FACS: Fluorescence activated cell sorting
- FC: Flow cytometry
- ICC: Immunocytochemistry
- IF: Immunofluorescence microscopy
- IHC: Immunohistochemistry
- IP: Immunoprecipitation
- RIA: Radioimmunoassay
- WB: Western blotting

**Properties**

- **Formulation:** Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide
- **Purification:** The antibody was purified by affinity chromatography.
- **Stability and Storage:** Product stable at 2 - 8°C when stored undiluted. Do not freeze. For product expiry date, please contact techsupport@stemcell.com.
- **Directions for Use:** For flow cytometry the suggested use of this antibody is ≤ 0.25 μg per 1 x 10^6 cells in 100 μL volume. It is recommended that the antibody be titrated for optimal performance for each application.
Antibodies

Anti-Mouse CD150 Antibody, Clone TC15-12F12.2

Data

Flow cytometry analysis of C57BL/6 mouse splenocytes labeled with Anti-Mouse CD150 Antibody, Clone TC15-12F12.2, followed by a mouse anti-rat IgG2a antibody, FITC (filled histogram), or a rat IgG2a isotype control antibody, followed by a mouse anti-rat IgG2a antibody, FITC (solid line histogram).
