**Product Description**

The HCD56 antibody reacts with CD56 (NCAM), a member of the immunoglobulin (Ig) super family containing 5 Ig-like domains and two fibronectin type-3 domains in its extracellular portion. Multiple isoforms have been identified, including transmembrane and GPI-anchored forms. CD56 is subject to several types of post-translational modification, including addition of a polysialic acid moiety to the 5th Ig-like domain. The ~140 kDa isoform of CD56 is considered the prototypic cell surface marker on human NK cells. Around 90% of the NK cells express CD56 at low density while ~10% express the protein at relatively high levels. CD56 is also variably expressed by a subset of NKT cells in peripheral blood, neurons, muscle cells, some stem cells, and in vitro-cultured T cell clones. It is also expressed by several types of tumors, including myeloma, neuroblastoma and small cell lung carcinoma cells. CD56 mediates cell-cell and cell-matrix adhesion via homophilic and heterophilic interactions, respectively, and has been implicated in activating intracellular signaling pathways. CD56 plays important roles in neuronal development both during embryogenesis and in adults.

**Target Antigen Name:** CD56 (NCAM)

**Alternative Names:** Leu-19, N-CAM, NCAM-1, NKH1

**Gene ID:** 4684

**Species Reactivity:** Human

**Host Species:** Mouse

**Clonality:** Monoclonal

**Clone:** HCD56

**Isotype:** IgG1, kappa

**Immunogen:** Full-length human CD56 protein

**Conjugate:** Unconjugated

**Applications**

**Verified:** FC

**Reported:** CyTOF®, FC, IHC

**Special Applications:** This antibody clone has been verified for purity assessments of cells isolated with EasySep™ kits, including EasySep™ HLA Buffy Coat CD56 Positive Selection Kit (Catalog #18085HLA) and EasySep™ Human CD56 Positive Selection Kit (Catalog #18055); partial blocking may be observed, as well as EasySep™ HLA CD2 Positive Selection Kit (Catalog #18657HLA) and EasySep™ Human NK Cell Enrichment Kit (Catalog #19055).

**Properties**

**Formulation:** Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide

**Purification:** The antibody was purified by affinity chromatography.

**Stability and Storage:** Product stable at 2 - 8°C when stored undiluted. Do not freeze. For product expiry date, please contact techsupport@stemcell.com.

**Directions for Use:** For flow cytometry the suggested use of this antibody is ≤ 2 μg per 1 x 10^6 cells in 100 μL volume. It is recommended that the antibody be titrated for optimal performance for each application.
(A) Flow cytometry analysis of human buffy coat nucleated cells labeled with Anti-Human CD56 Antibody, Clone HCD56, followed by Goat Anti-Mouse IgG (H+L) Antibody, Polyclonal, FITC (Catalog #60138FI) and Anti-Human CD45 Antibody, Clone HI30, APC (Catalog #60018AZ).

(B) Flow cytometry analysis of human buffy coat nucleated cells labeled with a mouse IgG1, kappa isotype control antibody, followed by Goat Anti-Mouse IgG (H+L) Antibody, Polyclonal, FITC and Anti-Human CD45 Antibody, Clone HI30, APC.
