Product Description

StemSpan™ Erythroid Expansion Supplement (100X) contains a combination of recombinant human cytokines formulated to selectively promote the expansion and differentiation of erythroid progenitor cells from CD34+ cells isolated from human cord blood (CB) or bone marrow (BM) samples.

StemSpan™ Erythroid Expansion Supplement (100X) is intended for use in combination with any of the following StemSpan™ media:

- StemSpan™ SFEM (Catalog #09600) serum-free medium
- StemSpan™ SFEM II (Catalog #09605) improved version of SFEM serum-free medium
- StemSpan™-ACF-E (Catalog #09955) human and animal component-free medium specifically for the differentiation of erythroid progenitor cells

Advantages:

- Formulated to produce large numbers of human erythroid cells in liquid cultures initiated with CD34+ CB or BM cells.
- Optimized for use with StemSpan™ media. When combined with StemSpan™ SFEM II in particular, supports up to 4-fold higher expansion of erythroid cells from human CD34+ CB cells than other serum-free media on the market.
- Supplied as a 100X concentrate. After thawing and mixing, the tube contents can be added directly to any hematopoietic cell expansion medium of choice.

Properties

Storage: Store at -20°C to -70°C.

Shelf Life: Stable until expiry date (EXP) on label.

Contains:

- Recombinant human stem cell factor (SCF)
- Recombinant human interleukin 3 (IL-3)
- Recombinant human erythropoietin (EPO)

Handling / Directions For Use

1. Thaw StemSpan™ Erythroid Expansion Supplement at room temperature (15 - 25°C) until just thawed and mix well.
NOTE: If necessary, centrifuge for 30 seconds to recover liquid from cap.
NOTE: Once thawed, store supplement at 2 - 8°C for up to 1 month. Alternatively, aliquot and store at -20°C. After thawing aliquots, do not re-freeze.
2. Add StemSpan™ Erythroid Expansion Supplement to culture medium at a 1 in 100 dilution (e.g. add 1 mL of Supplement to 99 mL of culture medium). Mix well.

ASSESSMENT OF DIFFERENTIATED CELLS

Assessment of HSPCs before and after culture, and erythroid progenitor cells after culture, may be performed by flow cytometry using the following fluorochrome-conjugated antibody clones:

- Anti-Human CD34 Antibody, Clone 581 (Catalog #60013) or Clone 563 (Catalog #60119) or Clone 8G12 (Catalog #60121)
- Anti-Human CD45 Antibody, Clone HI30 (Catalog #60018) or Clone 2D1 (Catalog #60123)
- Anti-Human CD235a (Glycophorin A) Antibody, Clone 2B7 (Catalog #60152)
- Anti-Human CD71 (Transferrin Receptor) Antibody, Clone OKT9 (Catalog #60106)
