**Properties**

- **Formulation:** Aqueous buffer containing 0.09% sodium azide, may contain carrier protein/stabilizer.
- **Purification:** The antibody was purified by column chromatography.
- **Stability and Storage:** Product stable at 2 - 8°C when stored undiluted. Do not freeze. Protect product from prolonged exposure to light. For product expiry date, please contact techsupport@stemcell.com.
- **Directions for Use:** The suggested use of this antibody is: FC, ≤ 1 μg per 1 x 10^6 cells in 100 μL volume; ICC/IF, ≤ 10 μg/mL. It is recommended that the antibody be titrated for optimal performance for each application.

### Product Description

The 10C2 antibody reacts with human nestin, a class VI intermediate filament (IF) protein expressed by embryonic neuroepithelial stem cells in the developing nervous system and by pancreatic islet and mesenchymal progenitor cells. Nestin expression is also observed in glioblastomas and many primary and metastatic melanomas and it is a useful angiogenic marker to evaluate neovascularity of endothelial cells in tumors. Nestin is required for the survival and renewal of neural progenitor cells and plays roles in cellular remodeling by forming heterodimers with vimentin or alpha-internexin, a process that appears to be tightly regulated by phosphorylation. Nestin localizes to the growth cones during axon elongation in differentiating neurons and may play a role in growth cone guidance. Nestin expression is down-regulated during differentiation, typically disappearing by embryonic stage E18. The 10C2 antibody reportedly cross-reacts weakly with monkey nestin but not rodent nestin. A doublet band of ~220 - 250 kDa is observed on western blots with this antibody.

### Applications

- **Verified:** FC, ICC, IF
- **Reported:** ICC, IF, IHC
- **Special Applications:** This antibody clone has been verified for labeling human neural stem and progenitor cells grown with STEMdiff™ Neural Induction Medium (Catalog #05835), STEMdiff™ Neural Progenitor Medium (Catalog #05833) and NeuroCult™ NS-A Proliferation Kit (Human; Catalog #05751).

### Abbreviations:

- CellSep: Cell separation
- ChIP: Chromatin immunoprecipitation
- FA: Functional assay
- FC: Flow cytometry
- ICC: Immunocytochemistry
- IF: Immunofluorescence microscopy
- IHC: Immunohistochemistry
- IP: Immunoprecipitation
- RIA: Radioimmunoassay
- WB: Western blotting
Data

Flow cytometry analysis of human neural progenitor cells (NPCs) generated from induced pluripotent stem (iPS) cells using STEMdiff™ Neural Induction Medium and cultured on Corning® Matrigel®. NPCs were fixed and labeled with Anti-Human Nestin Antibody, Clone 10C2, Alexa Fluor® 488 (filled histogram) or a mouse IgG1, kappa Alexa Fluor® 488 isotype control antibody (solid line histogram).
