Iscove’s MDM with 2% FBS

Medium for preparing and washing samples for CFU assays

Catalog # 07700 100 mL

Product Description

Iscove’s Modified Dulbecco’s Medium (MDM) with 2% Fetal Bovine Serum (FBS) is recommended for preparing and washing bone marrow, peripheral blood, or cord blood cell samples for colony-forming unit (CFU) assays.

For complete instructions on cell preparation and detection of progenitor cells in CFU assays, refer to the Technical Manual: Human Colony-Forming Unit (CFU) Assays Using MethoCult™ (Document #28404), available at www.stemcell.com or contact us to request a copy.

The contents of one 100 mL bottle are sufficient for processing at least four samples.

Properties

Storage: Store at -20°C.

Shelf Life: Stable until expiry date (EXP) on label.

Contains:
• Pre-screened FBS (2%)
• Other ingredients

Handling / Directions For Use

NOTE: If product is received partially thawed, place immediately at -20°C.

1. Thaw Iscove’s MDM with 2% FBS at room temperature (15 - 25°C) or overnight at 2 - 8°C.
2. Use immediately or store at 2 - 8°C for up to 1 month. Alternatively, aliquot and store at -20°C. Once aliquots are thawed, do not re-freeze.
