## Antibodies

Hamster (Armenian) monoclonal IgG1 antibody against mouse CD3 $\epsilon$ , biotin-conjugated

Catalog #60015BT  
#60015BT.1

500  $\mu$ g 0.5 mg/mL  
50  $\mu$ g 0.5 mg/mL

FOR RESEARCH USE ONLY. NOT INTENDED FOR HUMAN OR ANIMAL DIAGNOSTIC OR THERAPEUTIC USES.

## Product Description

The 145-2C11 antibody reacts with the ~20 kDa CD3 $\epsilon$  subunit of the mouse T cell receptor (TCR)/CD3 complex, which is expressed on the surface of circulating mature T cells and NK-T cells, and variably on thymocytes. A majority of T cell neoplasms also express CD3. The CD3 complex, which is assembled from combinations of CD3 $\gamma$ ,  $\delta$ ,  $\epsilon$ ,  $\eta$  and  $\zeta$  subunits, associates non-covalently with the TCR and is involved in transducing antigen recognition signals into the cytoplasm of T cells and in regulating the cell surface expression of the TCR. Activation of T cells by the TCR involves the cytoplasmic tails of the CD3 subunits, which are structurally related type 1 transmembrane proteins and members of the immunoglobulin super family. Mutations in the CD3 subunits have been associated with various immunodeficiency disorders including severe combined immunodeficiency (SCID). The 145-2C11 antibody has been used for in vitro functional (blocking and activation) assays and has been reported to block binding by the clone 17A2 antibody. The 145-2C11 antibody is not recommended for use with formalin-fixed, paraffin-embedded sections.

Target Antigen Name:	CD3 $\epsilon$
Alternative Names:	CD3, CD3epsilon, T3
Gene ID:	12501
Species Reactivity:	Mouse
Host Species:	Hamster (Armenian)
Clonality:	Monoclonal
Clone:	145-2C11
Isotype:	IgG1, kappa
Immunogen:	H-2Kb-specific mouse cytotoxic T lymphocyte clone BM10-37
Conjugate:	Biotin

## Applications

Verified:	CellSep, FC
Reported:	ELISA, FA, FC, IF, IHC, IP, WB
Special Applications:	This antibody clone has been verified for purity assessments of cells isolated with EasySep™ kits, including EasySep™ Mouse T Cell Isolation Kit (Catalog #19851).

Abbreviations: CellSep: Cell separation; ChIP: Chromatin immunoprecipitation; FA: Functional assay; FC: Flow cytometry; ICC: Immunocytochemistry; IF: Immunofluorescence microscopy; IHC: Immunohistochemistry; IP: Immunoprecipitation; WB: Western blotting

## Properties

Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide
Purification:	The antibody was purified by affinity chromatography and conjugated with biotin under optimal conditions. The solution is free of unconjugated biotin.
Stability and Storage:	Product stable at 2 - 8°C when stored undiluted. Do not freeze. For product expiry date, please contact techsupport@stemcell.com.
Directions for Use:	For flow cytometry the suggested use of this antibody is $\leq 0.25 \mu$ g per $1 \times 10^6$ cells in 100 $\mu$ L volume. It is recommended that the antibody be titrated for optimal performance for each application.

## Data

Flow cytometry analysis of C57BL/6 mouse splenocytes labeled with Anti-Mouse CD3e Antibody, Clone 145-2C11, Biotin followed by streptavidin (SAV) APC (filled histogram) or an Armenian hamster IgG biotin isotype control antibody followed by SAV APC (solid line histogram).
