Anti-Mouse F4/80 Antibody,
Clone BM8, PerCP-Cy5.5

Antibodies
Rat monoclonal IgG2a antibody against human, mouse F4/80, PerCP-Cy5.5-conjugated
Catalog #60027PS
#60027PS.1
100 µg 0.2 mg/mL
25 µg 0.2 mg/mL

Product Description
The BM8 antibody reacts with the F4/80 antigen (also termed Ly-71 in mouse and EMR-1 in human), an ~160 kDa transmembrane glycoprotein belonging to the EGF-TM7 family of G-protein-coupled receptors. F4/80 is considered a marker of choice for the identification of mature tissue macrophages, being broadly but variably expressed by this cell type in the liver (Kupffer cells), skin (Langerhans cells), bone marrow stroma, pancreas, thymus, spleen (red pulp), lung, and other tissues. It is also expressed by circulating monocytes, eosinophils and a subset of dendritic cells. F4/80 expression levels increase following activation of macrophages. F4/80 is reportedly the only macrophage marker suitable for distinguishing destructive from non-destructive inflammatory processes in the pancreas. The protein is thought to play a role in the generation of CD8+ regulatory T cells involved in immune tolerance.

Target Antigen Name: F4/80
Alternative Names: EMR1, Ly71
Gene ID: 13733
Species Reactivity: Human, Mouse
Host Species: Rat
Clonality: Monoclonal
Clone: BM8
Isotype: IgG2a, kappa
Immunogen: Murine (BALB/c) macrophages obtained from 14-day-old bone marrow cell cultures
Conjugate: PerCP-Cy5.5

Applications
Verified: FC
Reported: FC
Special Applications: This antibody clone has been verified for purity assessments of cells isolated with EasySep™ kits, including EasySep™ Mouse Monocyte Enrichment Kit (Catalog #19761) and EasySep™ Mouse CD11b Positive Selection Kit (Catalog #18770).

Abbreviations: CellSep: Cell separation; ChIP: Chromatin immunoprecipitation; FA: Functional assay; FC: Flow cytometry; ICC: Immunocytochemistry; IF: Immunofluorescence microscopy; IHC: Immunohistochemistry; IP: Immunoprecipitation; RIA: Radioimmunoassay; WB: Western blotting

Properties
Formulation: Phosphate-buffered saline, pH 7.2, containing 0.09% sodium azide and 0.1% gelatin
Purification: The antibody was purified by affinity chromatography and conjugated with PerCP-Cy5.5 under optimal conditions. The solution is free of unconjugated PerCP-Cy5.5.
Stability and Storage: Product stable at 2 - 8°C when stored undiluted. Do not freeze. Protect product from prolonged exposure to light. For product expiry date, please contact techsupport@stemcell.com.
Directions for Use: For flow cytometry the suggested use of this antibody is ≤ 1 µg per 1 x 10^6 cells in 100 µL volume. It is recommended that the antibody be titrated for optimal performance for each application.
