Anti-Human CD105 Antibody, Clone 43A3, Biotin

**Antibodies**
Mouse monoclonal IgG1 antibody against human, mouse CD105 (endoglin), biotin-conjugated

Catalog #600398T

100 μg 0.5 mg/mL

**Product Description**

The 43A3 antibody reacts with CD105 (endoglin), an ~180 kDa cell surface glycoprotein which is a disulfide-bonded homodimer of ~90 kDa type I transmembrane subunits. CD105 is a component of the TGF-β receptor complex and is expressed by vascular endothelial smooth muscle cells, syncytiotrophoblasts of placenta and activated macrophages, and at relatively low levels by stromal fibroblasts. Its expression is also observed in some types of tumors and levels are up-regulated on the endothelium during angiogenesis. In concert with signaling receptors, CD105 binds to TGF-β1 and TGF-β3 with high affinity, but does not bind TGF-β2. Other ligands reportedly include Activin A, BMP-2 and BMP-7. CD105 has important roles in angiogenesis, cardiovascular development and vascular remodeling, and the protein serves a regulatory role in cytoskeletal reorganization by modulating the sites of focal adhesion and cellular migration. Certain mutations in CD105 result in the autosomal dominant disorder hereditary hemorrhagic telangiectasia.

**Target Antigen Name:** CD105 (Endoglin)

**Alternative Names:** Endoglin

**Gene ID:** 2022

**Species Reactivity:** Human, Mouse

**Host Species:** Mouse

**Clonality:** Monoclonal

**Clone:** 43A3

**Isotype:** IgG1, kappa

**Immunogen:** L-cells transfected with human CD105

**Conjugate:** Biotin

**Applications**

Verified: FC

Reported: FC

Special Applications: This antibody clone has been verified for labeling human mesenchymal cells grown in MesenCult™ Proliferation Kit (Human; Catalog #05411) and MesenCult™-XF Medium (Catalog #05420).

**Properties**

**Formulation:** Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide

**Purification:** The antibody was purified by affinity chromatography and conjugated with biotin under optimal conditions. The solution is free of unconjugated biotin.

**Stability and Storage:** Product stable at 2 - 8°C when stored undiluted. Do not freeze. For product expiry date, please contact techsupport@stemcell.com.

**Directions for Use:** For flow cytometry the suggested use of this antibody is ≤ 2 μg per 1 x 10^6 cells in 100 μL volume. It is recommended that the antibody be titrated for optimal performance for each application.
Data

Flow cytometry analysis of human peripheral blood mononuclear cells (PBMCs) cultured for 24 hours with or without lipopolysaccharide (LPS) and labeled with Anti-Human CD105 Antibody, Clone 43A3, Biotin, followed by streptavidin (SAV) APC. Histograms show labeling of PBMCs cultured in the absence (Unstimulated) or presence (Stimulated) of LPS. Labeling of LPS-stimulated PBMCs with a biotinylated mouse IgG1, kappa isotype control antibody, followed by SAV APC is shown (solid line histogram).
