## Antibodies

Mouse monoclonal IgG1 antibody  
against human, rhesus, cynomolgus  
CD11b, FITC-conjugated

Catalog #60040FI  
#60040FI.1

100 Tests 5 µL/test  
25 Tests 5 µL/test

## Product Description

The ICRF44 antibody reacts with an extracellular epitope on CD11b (integrin  $\alpha$ M), an ~170 kDa type 1 transmembrane glycoprotein which associates non-covalently with CD18 to form the heterodimeric Mac-1 receptor. Through its interactions with ligands such as ICAM-1 (CD54), ICAM-2 (CD102), ICAM-4 (CD242), iC3b, heparin, and fibrinogen, Mac-1 influences several processes, including the adherence of neutrophils and monocytes to stimulated endothelium, and phagocytosis of complement-coated particles. CD11b is expressed on the surface of granulocytes, monocytes, NK cells, dendritic cells, tissue macrophages, and subsets of T and B cells, and has been used as a marker to distinguish naïve and memory CD8+ T cells. CD11b is a relatively late marker for myeloid differentiation, and is undetectable on most myelomonocytic hematopoietic progenitor cells and more primitive cells. Certain mutations in CD11b give rise to the disorder systemic lupus erythematosus. The ICRF44 antibody reportedly inhibits leukocyte aggregation in response to the chemoattractant fMLP.

Target Antigen Name:	CD11b
Alternative Names:	C3biR, CR3, Integrin $\alpha$ M chain, Mac-1, MAC1, Mo1
Gene ID:	3684
Species Reactivity:	Human, Rhesus, Cynomolgus, Baboon, Chimpanzee, Common Marmoset, Pig
Host Species:	Mouse
Clonality:	Monoclonal
Clone:	ICRF44
Isotype:	IgG1, kappa
Immunogen:	Human rheumatoid synovial cells and monocytes
Conjugate:	FITC (Fluorescein isothiocyanate)

## Applications

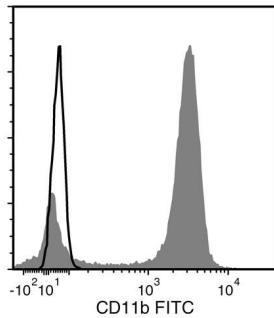

Verified:	FC
Reported:	FC
Special Applications:	This antibody clone has been verified for purity assessments of cells isolated with EasySep™ kits, including EasySep™ Human Monocyte Enrichment Kit (Catalog #19059), and for labeling human mesenchymal cells grown in MesenCult™ Proliferation Kit (Human; Catalog #05411).

Abbreviations: CellSep: Cell separation; ChIP: Chromatin immunoprecipitation; FA: Functional assay; FACS: Fluorescence-activated cell sorting; FC: Flow cytometry; ICC: Immunocytochemistry; IF: Immunofluorescence microscopy; IHC: Immunohistochemistry; IP: Immunoprecipitation; RIA: Radioimmunoassay; WB: Western blotting

## Properties

Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) bovine serum albumin
Purification:	The antibody was purified by affinity chromatography and conjugated with FITC under optimal conditions. The solution is free of unconjugated FITC.
Stability and Storage:	Product stable at 2 - 8°C when stored undiluted. Do not freeze. Protect product from prolonged exposure to light. For product expiry date, please contact <a href="mailto:techsupport@stemcell.com">techsupport@stemcell.com</a> .
Directions for Use:	For flow cytometry the suggested use of this antibody is $\leq 5 \mu\text{L}$ per $1 \times 10^6$ cells in 100 $\mu\text{L}$ or per 100 $\mu\text{L}$ of whole blood. It is recommended that the antibody be titrated for optimal performance for each application.

## Data

Flow cytometry analysis of human whole blood nucleated cells labeled with Anti-Human CD11b Antibody, Clone ICRF44, FITC (filled histogram) or a mouse IgG1, kappa isotype control antibody, FITC (solid line histogram).
