Small Molecules

KY02111

WNT pathway inhibitor

Catalog # 72582

5 mg

Product Description

KY02111 promotes the differentiation of pluripotent stem cells (PSCs) to cardiomyocytes by inhibiting canonical WNT signaling in a manner distinct from that of other WNT inhibitors (Minami et al.).

Molecular Name: KY02111
Alternative Names: Not applicable
CAS Number: 1118807-13-8
Chemical Formula: C₁₈H₁₇ClN₂O₃S
Molecular Weight: 376.9 g/mol
Purity: ≥ 95%
Chemical Name: N-(6-chloro-1,3-benzothiazol-2-yl)-3-(3,4-dimethoxyphenyl)propanamide

Structure:

![Chemical Structure Image]

Properties

Physical Appearance: A crystalline solid
Storage: Product stable at -20°C as supplied. Protect from prolonged exposure to light. For product expiry date, please contact techsupport@stemcell.com.
Solubility:
- DMSO ≤ 25 mM
  For example, to prepare a 10 mM stock solution in DMSO, resuspend 1 mg in 265 µL of fresh DMSO.

Prepare stock solution fresh before use. Information regarding stability of small molecules in solution has rarely been reported, however, as a general guide we recommend storage in DMSO at -20°C. Aliquot into working volumes to avoid repeated freeze-thaw cycles. The effect of storage of stock solution on compound performance should be tested for each application.

Compound has low solubility in aqueous media. For use as a cell culture supplement, stock solution should be diluted into culture medium immediately before use. Avoid final DMSO concentration above 0.1% due to potential cell toxicity.
Published Applications

DIFFERENTIATION
- Promotes cardiomyocyte differentiation of human and mouse PSCs in combination with BIO, CHIR99021, and XAV939 (Minami et al.).
