Product Description

The RTK2758 antibody (IgG2a, kappa) is suitable for use as an isotype-matched control antibody in several applications to estimate the degree of non-specific binding by an antigen-specific antibody. Ideally, the isotype control should have the same subclass of heavy chain (IgA, IgD, IgE, IgG, or IgM) and light chain (kappa or lambda) as the specific antibody being employed. If a conjugated antibody is employed, an isotype control conjugated to the same molecule (e.g. fluorochrome) should be chosen. The use of an appropriate isotype control helps confirm the specificity of the antigen-specific antibody and indicates non-specific binding that may result from binding to Fc receptors or other cell components. The RTK2758 antibody recognises keyhole limpet hemocyanin and has unknown binding specificity, having been screened on a variety of activated, resting, live, and fixed tissues from several species, including mouse, rat, human, and non-human primates.

Target Antigen Name: IgG2a Isotype Control
Alternative Names: Not applicable
Gene ID: Not applicable
Species Reactivity: Not applicable
Host Species: Rat
Clonality: Monoclonal
Clone: RTK2758
Isotype: IgG2a, kappa
Immunogen: Trinitrophenol + KLH
Conjugate: Unconjugated

Applications

Verified: FC
Reported: FA, FC, ICC, IF, IHC, IP, WB
Special Applications: This antibody clone has been verified for use as an isotype control antibody for assessing non-specific binding to cells in flow cytometry applications.

Abbreviations: CellSep: Cell separation; ChIP: Chromatin immunoprecipitation; FA: Functional assay; FC: Flow cytometry; ICC: Immunocytochemistry; IF: Immunofluorescence microscopy; IHC: Immunohistochemistry; IP: Immunoprecipitation; RIA: Radioimmunoassay; WB: Western blotting

Properties

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide
Purification: The antibody was purified by affinity chromatography.
Stability and Storage: Product stable at 2 - 8°C when stored undiluted. Do not freeze. For product expiry date, please contact techsupport@stemcell.com.
Directions for Use: The suggested use of this antibody is at concentrations comparable to those of the specific antibody of interest.
Antibodies

Rat IgG2a, kappa Isotype Control Antibody, Clone RTK2758

Data

Flow cytometry analysis of C57BL/6 mouse splenocytes labeled with Rat IgG2a, kappa Isotype Control Antibody, Clone RTK2758, followed by a mouse anti-rat IgG2a antibody, FITC (solid line histogram). Filled histogram shows labeling with a rat IgG2a, kappa positive control antibody (Anti-Mouse CD8a Antibody, Clone 53-6.7; Catalog #60023) followed by a mouse anti-rat IgG2a antibody, FITC.
