Product Description

The anti-GFAP antibody reacts with glial fibrillary acidic protein (GFAP), an ~55 kDa type III intermediate filament protein. GFAP is a differentiation marker for astrocytes, and it is localized in normal central nervous system tissue, and certain tumor and metastases of the glial antigen. This antibody is suitable for immunofluorescent labeling of cultured mammalian cells.

Target Antigen Name: GFAP
Alternative Names: Glial fibrillary acidic protein
Gene ID: 2670 (human), 24387 (rat)
Species Reactivity: Human, Mouse, Rat, Cat
Host Species: Rabbit
Clonality: Polyclonal
Clone: Not applicable
Isotype: Not applicable
Immunogen: GFAP from human brain
Conjugate: Unconjugated

Applications

Verified: IHC, WB
Reported: ICC, IF, IHC, WB

Properties

Formulation: Phosphate-buffered saline, pH 7.4, containing 15 mM sodium azide
Purification: The antibody was purified by column chromatography.
Stability and Storage: Product stable 2 - 8°C for 1 month when stored undiluted. For longer-term storage, aliquot and store at -20°C. After thawing aliquots, do not re-freeze. For product expiry date, please contact techsupport@stemcell.com.
Directions for Use: The suggested use of this antibody is: IHC, 1:80 - 1:400 dilution; WB, 1:500 dilution. It is recommended that the antibody be titrated for optimal performance for each application. For further instructions on how to use this antibody, refer to the Technical Manual: In Vitro Proliferation and Differentiation of Human Neural Stem and Progenitor Cells Using NeuroCult™ or NeuroCult™-XF (Document #28724), available at www.stemcell.com or contact us to request a copy.
