Interleukin 2

Catalog #	78081	20 µg
	78081.1	100 µg
	78081.2	1000 µg

Product Description

Interleukin 2 (IL-2) is a monomeric cytokine that was originally identified as a T cell growth factor (Gaffen & Liu). It binds to a heterotrimeric receptor consisting of CD25, CD122, and CD132. Upon binding, it activates JAK3-, STAT5-, and AKT-dependent signaling pathways, which results in cellular proliferation and survival (Ma et al.). The majority of IL-2 is secreted by activated CD4+ and CD8+ T cells, although B cells and dendritic cells were found to produce IL-2 in small amounts. IL-2 downregulates immune responses to prevent autoimmunity during thymic development, influences the development of CD4+CD25+ regulatory T cells, and affects development of follicular helper T cells. IL-2 also controls inflammation by inhibiting Th17 differentiation (Banchereau et al.). Targeted deletions of the IL-2 gene in mice resulted in development of autoimmune hemolytic anemia, followed by ulcerative colitis. Similar effects were observed in mice that were deficient in IL-2 receptor α (Gaffen & Liu).

Product Information

Alternative Names:	Aldesleukin, Interleukin-2, T cell growth factor, TCGF
Accession Number:	P04351
Amino Acid Sequence:	MAPTSSSTSS STAEAQQQQ QQQQQQHLE QLLMDLQELL SRMENYRNLK LPRMLTFKFY LPKQATELKD LQCLEDELGP LRHVLDLTQS KSFQLEDAEN FISNIRVTVV KLKGSNDNTE CQFDDESATV VDFLRRWIAF CQSIISTSPQ
Predicted Molecular Mass:	17.4 kDa
Species:	Mouse
Cross Reactivity:	Human
Formulation:	Lyophilized from a sterile-filtered aqueous solution containing sodium citrate, pH 4.0.
Source:	E. coli

Specifications

Activity:	The specific activity is $\geq 2 \times 10^5$ units/mg ($EC_{50} \leq 5$ ng/mL) as determined by a cell proliferation assay using CTLL-2 cells.
Purity:	$\geq 95\%$
Endotoxin Level:	Measured by kinetic Limulus amoebocyte lysate (LAL) analysis and is ≤ 1 EU/ μ g protein.

Preparation and Storage

Storage:	Store at -20°C to -80°C.
Stability:	Stable as supplied for 12 months from date of receipt.
Preparation:	Centrifuge vial before opening. Reconstitute the product in sterile 10 mM acetic acid to at least 0.1 mg/mL by pipetting the solution down the sides of the vial. Do not vortex.

OPTIONAL: After reconstitution, if product will not be used immediately, dilute with concentrated bovine serum albumin (BSA) to a final BSA concentration of 0.1%. The effect of storage of stock solution on product performance should be tested for each application. As a general guide, do not store at 2 - 8°C for more than 1 month or at -80°C for more than 3 months. Avoid repeated freeze-thaw cycles.

Data

(A) The biological activity of Mouse Recombinant IL-2 was tested by its ability to promote the proliferation of CTLL-2 cells. Cell proliferation was measured after 3 days of culture using a fluorometric assay method. The EC₅₀ is defined as the effective concentration of the protein at which cell proliferation is at 50% of maximum. The EC₅₀ in the above example is 1.12 ng/mL.

(B) 1 µg of Mouse Recombinant IL-2 was resolved with SDS-PAGE under reducing (+) and non-reducing (-) conditions and visualized by Coomassie Blue staining. Mouse Recombinant IL-2 has a predicted molecular mass of 17.4 kDa.
