Dissociation Reagents

Collagenase A, ACF

Animal component-free collagenase for the digestion of native collagen fibrils

Catalog #	07434	100 mg
	07435	1 g

Product Description

Collagenase A, Animal Component-Free (ACF) is obtained from cultures free of animal-derived materials. Collagenase is a protease consisting of a single polypeptide chain approximately 1,000 amino acid residues in length. Collagenase is capable of digesting native collagen fibrils commonly found in connective tissues and therefore is frequently used for tissue dissociation. Collagenase preparations contain the activity of several proteases, including collagenase, caseinase, clostripain, and trypsin (Kessler & Yaron). Collagenase A, ACF contains levels of proteolytic activity similar to type I and type II collagenases. Collagenase A, ACF is intended for use in applications where it is necessary to prevent the introduction of potential animal-derived pathogens.

Product Information

Alternative Names:	Clostridium histolyticum collagenase; Collagenase A
Format:	Lyophilized powder
Storage:	Store at 2 - 8°C.
Stability:	Stable until expiry date (EXP) on label.
Reconstitution:	Dissociation reagents can be reconstituted in a balanced salt solution or buffer of choice.
Molecular Weight:	68 - 130 kDa
CAS Number:	9001-12-1
Optimum pH:	6.3 - 8.5
Cleavage Site:	-Pro-X- † -Gly-Pro-Y- : X = neutral Y = nonspecific

Specifications

Source:	Clostridium histolyticum
Activity:	Collagenase: ≥ 150 CDU/mg dry weight (mgdw); Caseinase: ≥ 150 u/mgdw; Clostripain: ≤ 8.0 u/mgdw; Trypsin: ≥ 0.1 u/mgdw. See Notes for further information.

Notes

ACTIVITY UNITS
Collagenase: 1 collagenase digestion unit (CDU) equals 1 µmol of L-leucine equivalents released from collagen in 5 hours at 37°C, pH 7.5.
Caseinase: 1 unit equals 1 µmol of L-leucine equivalents released from 25 mg vitamin-free casein in 5 hours at 37°C, pH 7.5. Measures non-specific proteolytic activity.
Clostripain: 1 unit hydrolyzes 1 µmol of Nα-benzoyl-L-arginine ethyl ester (BAEE)/minute at 25°C at pH 7.6, after activation in 2.5 mM dithiothreitol (DTT).
Trypsin: 1 unit hydrolyzes 1 µmol of BAEE/minute at 25°C at pH 7.6.
