Product Description

The Corning® 96-Well Round-Bottom Microplate is recommended for use with EasySep™ cell separation when using the EasyPlate™ EasySep™ Magnet (Catalog #18102). This plate can also be used in any application where round-bottom assay plates are used. The untreated polystyrene surface is hydrophobic and binds biomolecules through passive interactions. Corning® 96-Well Round-Bottom Microplate is suitable for the immobilization of large molecules, such as antibodies, that have large hydrophobic regions that can interact with the microplate surface.

100 Plates; 20 Plates/bag (Corning Catalog #3788)

APPLICATIONS

- Cell separation
- Immobilization of large molecules

Properties

Storage: Store at 15 - 25°C.

Shelf Life: Stable until expiry date on manufacturer label.

Features

MATERIALS

- Plate and lid: clear and transparent polystyrene
- Hydrophobic and non-charged

DIMENSIONS

- Conforms to standard microplate footprint and dimensions

CAPACITY

- 0.33 mL per well
- Recommended working volume of 0.075 - 0.2 mL

STERILITY

- Gamma irradiation

Handling / Directions For Use

Use as directed in protocol of choice.

Notes and Tips
