Human Recombinant EGF, ACF

Epidermal growth factor, animal component-free

Catalog #
- 78136 100 μg
- 78136.1 500 μg
- 78136.2 1000 μg

Product Description
Epidermal growth factor (EGF) is characterized by high-affinity binding to various EGF receptors (EGFRs) and the production of mitogenic responses (Carpenter & Cohen). EGF promotes EGFR dimerization, resulting in activation of downstream pathways including PI3K, ERK1/2, JAK/STAT, β-catenin, and calcium signaling. EGF is secreted by the gut-associated salivary and Brunner’s glands, is found in a variety of body fluids, and stimulates cell proliferation and differentiation in rodent and neonatal human intestine (Wright et al.). Central nervous system stem cells also proliferate in response to the EGF stimulus (Reynolds & Weiss). This product is animal component-free.

Product Information

Alternative Names: Beta-urogastrone, HOMG4, Epidermal growth factor, Pro-epidermal growth factor, URG, Urogastrone
Accession Number: P01133
Amino Acid Sequence: NSD3ECPLSH DGYCLHDGVC MYIIEALDKYA CNCVGVYIGE RCQYRDLKW ELR
Predicted Molecular Mass: 6.2 kDa
Species: Human
Cross Reactivity: Mouse, Rat, Monkey
Formulation: Lyophilized from a sterile-filtered aqueous solution containing 0.1% trifluoroacetic acid
Source: E. coli

Specifications

Activity: The specific activity is ≥ 1.0 x 10^7 units/mg (EC50 ≤ 0.1 ng/mL) as determined by a cell proliferation assay using BALB/c 3T3 cells.
Purity: ≥ 95%
Endotoxin Level: Measured by kinetic Limulus amebocyte lysate (LAL) analysis and is ≤ 1 EU/μg protein.

Preparation and Storage

Storage: Store at -20°C to -80°C.
Stability: Stable as supplied for 12 months from date of receipt.
Preparation: Centrifuge vial before opening. Resuspend the product in sterile water containing 0.1% bovine serum albumin (BSA) to at least 0.1 mg/mL by pipetting the solution down the sides of the vial. Do not vortex. Store at 2 - 8°C for up to 1 month or at -20°C to -80°C for up to 3 months. Avoid repeated freeze-thaw cycles. NOTE: If reconstituted product will be used immediately, BSA is not required.
Cytokines

Human Recombinant EGF, ACF

Data

(A) The biological activity of Human Recombinant EGF, ACF was tested by its ability to promote the proliferation of BALB/c 3T3 cells. Cell proliferation was measured using a fluorometric assay method. The EC50 is defined as the effective concentration of the growth factor at which cell proliferation is at 50% of maximum. The EC50 in the example above is 0.0459 ng/mL.

(B) 1 μg of Human Recombinant EGF, ACF was resolved with SDS-PAGE under reducing (+) and non-reducing (-) conditions and visualized by Coomassie Blue staining.
