## Product Description

Costar® Microcentrifuge Tubes are RNase/DNase-free and are ideal for a wide variety of sample preparation, storage, and centrifugation tasks. The flat-top snap caps ensure a secure seal, are easy to open and close, and withstand repeated use. Tubes feature graduated markings, a frosted side panel, and a flat cap for easy labeling. Costar® Microcentrifuge Tubes, Low-Binding feature bonded polymer technology, which reduces protein and nucleic acid binding to the tube, thus increasing sample recovery. All Costar® Microcentrifuge Tubes are shipped non-sterile and are autoclavable.
