Interleukin 15, animal component-free

Catalog #	78218	10 µg
	78218.1	100 µg
	78218.2	500 µg
	78218.3	1000 µg

## Product Description

Interleukin 15 (IL-15) is a four-alpha helix bundle cytokine with many similar properties to IL-2. The IL-15 receptor is a heterotrimeric receptor composed of IL-15Ra (the high-affinity receptor for IL-15), as well as IL-2/15Rb (CD122) and common gamma chain (CD132). IL-15 binds to IL-15R $\alpha$  receptor and can then be presented in trans to IL-2/15Rb and common gamma chain on other cells. Trans-presentation is thought to be the major mechanism by which IL-15-mediated responses occur in mice, although may not be necessary in humans (Castillo et al.). The cytoplasmic domains of IL-2/15Rb and common gamma chain mediate signaling to activate JAK/STAT and PI3K pathways. IL-15 supports the survival and proliferation of naïve CD4+ and CD8+ T cells, and promotes homeostasis of memory T cells. IL-15 also promotes the survival and differentiation of NK cells and regulates their cytolytic activity (Ma et al.). This product is animal component-free.

## Product Information

Alternative Names:	IL-T, Interleukin-15
Accession Number:	P40933
Amino Acid Sequence:	MNWNVISDL KKIEDLIQSM HIDATLYTES DVHPSCKVTA MKCFLEELQV ISLESGDASI HDTVENLIIL ANNLSLSSNGN VTESGCKECE ELEEKNIKEF LQSFVHIVQM FINTS
Predicted Molecular Mass:	12.9 kDa
Species:	Human
Cross Reactivity:	Mouse, Monkey
Formulation:	Lyophilized from a sterile-filtered solution containing sodium bicarbonate, pH 8.5.
Source:	E. coli

## Specifications

Activity:	The specific activity is $\geq 2.0 \times 10^5$ units/mg ( $EC_{50} \leq 5$ ng/mL) as determined by a cell proliferation assay using CTLL-2 cells.
Purity:	$\geq 95\%$
Endotoxin Level:	Measured by kinetic Limulus amoebocyte lysate (LAL) analysis and is $\leq 1$ EU/ $\mu$ g protein.

## Preparation and Storage

Storage:	Store at -20°C to -80°C.
Stability:	Stable as supplied for 12 months from date of receipt.
Preparation:	Centrifuge vial before opening. Reconstitute the product in sterile water to at least 0.1 mg/mL by pipetting the solution down the sides of the vial. Do not vortex.

OPTIONAL: After reconstitution, if product will not be used immediately, dilute with concentrated bovine serum albumin (BSA) to a final BSA concentration of 0.1%. The effect of storage of stock solution on product performance should be tested for each application. As a general guide, do not store at 2 - 8°C for more than 1 month or at -20°C to -80°C for more than 3 months. Avoid repeated freeze-thaw cycles.

## Data

(A) The biological activity of Human Recombinant IL-15, ACF was tested by its ability to promote the proliferation of CTLL-2 cells. Cell proliferation was measured using a fluorometric assay method. The EC<sub>50</sub> is defined as the effective concentration of the growth factor at which cell proliferation is at 50% of maximum. The EC<sub>50</sub> in the above example is 0.043 ng/mL.

(B) 1 µg of Human Recombinant IL-15, ACF was resolved with SDS-PAGE under reducing (+) and non-reducing (-) conditions and visualized by Coomassie Blue staining. Human Recombinant IL-15, ACF has a predicted molecular mass of 12.9 kDa.
